Marshall County Rural Addressing Notes:

- Avenues (AVE.) are North-South roads with alphabetical names, which for the most part run West to East starting with Arney Ave.
- Streets (ST.) are East-West roads with numeric names, which run North (100th St.) to South (340th ST.)
- Boulevards (BLVD.), Circles (CR.), Roads (RD.) & WAYS are named after places or persons of historical significance and as such are not located in any logical sequence. Many diagonal roads have been named in this fashion.
- Drives (DR.) & Lanes (LN.) are private roads.
- Even addresses are on the South and East sides of the road.
- Odd addresses are on the North and West sides of the road.
- The house number, in all areas other than small-unincorporated areas, tell you how far the house is located from the north or west county line. The numbers start on the county line with 1000 and grow larger by 100 for each mile you progress south or east.
- In other than small unincorporated areas, the first two digits of the house number designate the "hundred mile" in which the house is located. Thus 2713 Jessup Ave. is located between 270th and 280th on Jessup Ave.
